

Declaration of 100% renewable energy utilisation

To whom it may concern,

We, Dutch Carbon Consultants, hereby declare that we have conducted a thorough review and verification concerning the electricity consumption of Fastned B.V. for the period of 1 January, 2025 up to and until 31 December, 2025.

Our assessment included an in-depth analysis of Fastned B.V.'s energy usage, sourcing, and the associated Guarantees of Origin (GoOs). The GoOs serve as proof that the electricity consumed by Fastned B.V. is sourced exclusively from renewable energy resources.

It is with certainty that all electricity sold by Fastned B.V. within the aforementioned period has been covered by GoOs. Therefore, we can confirm that all electricity sold by Fastned is from (local) renewable energy sources and can be considered 'free' of carbon emissions (i.e. the emission factor of electricity purchased from Fastned is '0').

For The Netherlands, Belgium and Germany, the GoOs are accredited evidence that the electricity comes from solar and wind. For other markets where Fastned operates, the Guarantees of Origin also include hydro and other renewable energy sources included in each country's energy mix over the given period.

We, Dutch Carbon Consultants, are pleased to provide this declaration based on the results of our verification process. Should there be any inquiries or need for further information regarding this declaration, please do not hesitate to contact us.

Sincerely,

Derek Groot
Director, Dutch Carbon Consultants
