2.3 What are the key risks that are specific to the Issuer?

Any decision to invest in the Bonds should be based on consideration of this Base Prospectus as a whole by the investor. In purchasing Bonds, investors assume the risk that the Issuer may become insolvent or otherwise be unable to make all payments due in respect of the Bonds.

There is a wide range of factors which individually or together could result in the Issuer becoming unable to make all payments due. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer may not be aware of all relevant factors and certain factors which it currently deems not to be material may become material as a result of the occurrence of events outside the Issuer's control. The Issuer has identified the following factors which could materially adversely affect its business, results of operations and prospects, thereby potentially negatively impacting the ability to make payments due.

Risks related to Fastned's industry:

- Fastned's growth depends on the growth of the number of FEVs on the road. A slower than anticipated increase, or even a decrease, in the growth of FEVs may therefore slow down Fastned's growth and have a material adverse effect on Fastned's business, results of operations and prospects.
- Fastned's growth depends on the demand of FEV drivers charging at Fastned's fast charging stations, a slower than anticipated increase, or even a decrease, in the growth of FEV drivers charging at Fastned's fast charging stations may therefore slow down Fastned's growth and have a material adverse effect on Fastned's business, results of operations and prospects.
- Fastned operates in a market that could become increasingly competitive. This could result in lower margins or in a loss of market share and may thus have a material adverse effect on Fastned's business, results of operations and prospects.

- An increasing price of renewable electricity could have an adverse effect on Fastned's results of operations and prospects.

Risks related to Fastned's business:

- Fastned may be unable to successfully execute its growth strategy in existing markets and expand into additional markets, which could have a material adverse effect on Fastned's business, results of operations and prospects.
- Fastned may not be able to identify and/or secure suitable sites that meet the requirements for site selection for new fast charging stations, with the result that Fastned will not be able to build and open new stations and therefore cannot grow the network enough resulting in Fastned not being able to benefit sufficiently from economies of scale which could have a material adverse effect on Fastned's business, results of operations and prospects.
- Fastned may not be able to connect new fast charging stations to the electricity grid, or operate stations at optimal capacity due to limited grid connection capacity which could lead to delays in the building process and have a material adverse effect on Fastned's business, results of operations, financial condition and prospects.
- If Fastned does not obtain the requisite permits and planning consents to build its fast charging stations in a timely manner, or at all, this could lead to delays in the building process and have a material adverse effect on Fastned's business, results of operations, financial condition and prospects.

Risks related to the regulatory and legal environment in which Fastned operates:

- Changes in the regulatory and political climate within Europe and in national policies or regulations related to tenders for fast charging locations and permits for fast charging stations, or no new tenders or permits for charging stations becoming available;
- Pending legal procedures may have an impact on the Fastned business case, take up management time, and result in internal management and legal counsel costs.
- Risk of expiry and unsuccessful retender of operating permits may have an adverse effect on the location portfolio of Fastned which could have an adverse effect on its business, results of operations and prospects.

Risks Relating to the Financial Environment in which Fastned Operates:

- Fastned has recorded losses in recent periods and may not achieve profitability in the future, this could have a material adverse effect on Fastned's financial condition.
- Fastned may not be able to secure additional financing in the future to implement its growth strategy. Not being able to implement its growth strategy could have a material adverse effect on the business, results of operations, financial condition and prospects of Fastned.
- Failure to comply with the interest terms as mentioned in the Final Terms of the Bonds could result in an event of default. Any failure to repay or refinance the outstanding Bonds when due could materially and adversely affect the business, results of operations, financial condition and prospects of Fastned.
- Fastned's inability to obtain subsidies for building its fast charging stations and/or receive payments under such subsidies could have a material adverse effect on Fastned's financial condition.

Taxation

All payments in respect of the Bonds will generally be made subject to any withholding or deduction for any taxes or duties of whatever nature imposed, levied or collected by or on behalf of The Netherlands, for which no additional amounts shall be paid to the Bondholders.

Under current Dutch tax legislation, however, all payments of principal and interest in respect of the Bonds can be made without deduction for or on account of withholding taxes imposed by the Netherlands.

3.2 Where will the securities be traded?

The Bonds will have a limited tradability. At the relevant Issue Date, the Bonds will not be listed or admitted to trading on any regulated exchange or on any other exchange. Investors may agree on a sale and purchase of the Bonds with other investors without involvement of the Issuer. The Issuer will solely provide a contract template for

such a transfer at request. The transfer of the Bonds will only take place after the Issuer has received the transfer contract as agreed and signed by both the purchaser and seller, and after the purchaser has paid a fee of EUR 100.- for each transaction to the Issuer to update its registers.

3.3 What are the risks that are specific to the securities?

The following is a summary of selected key risks that relate to the Bonds:

- Fastned may not generate sufficient revenues and/or be able to generate subsequent investments (refinancing) to be able to repay the principal amount of the Bond(s) at maturity. In such an event, the principal amount may not be (completely) repaid at maturity. This could result in a delay of repayment or in the worst case, the principal not being (fully) repaid at all.
- Fastned may not generate sufficient revenues and/or be able to generate subsequent investments (refinancing) to be able to (completely) make interest payments as they become due. This could result in a delay of interest payments or in worst case, the interest not being (fully) paid out.
- The Bonds have a limited tradability. The risk to investors is that they may not be able to sell Bonds in their possession at a moment they wish to do so, possibly not at any price. As a result, it is possible that investors have to wait until the moment of redemption to redeem the principal amount related to their investment in the Bonds.

4 KEY INFORMATION ON THE OFFER OF BONDS

The board of Fastned can decide at any time during the Subscription Period to extend the Subscription Period with a maximum of up to two additional weeks. In such a case the Issue Date and the Maturity Date will be extended with the same number of days, as well as the quarterly interest payment date. Any decision to amend the aforementioned terms of the Issue will be communicated immediately via the Website and any such notification will prevail over the information set out in the applicable Final Terms.

Net proceeds

The net proceeds from the offering of the Bonds will be applied by the Issuer to finance expansion and operation of the Fastned network of fast charging stations as well as for refinancing current debt.
