Fair use policy

Rules
The gold membership is intended to serve a maximum of one household. We therefore allow private drivers to use the different cars (max. 3) of their household under the same goldmembership.

If you are a business owner with one vehicle, you can also use the gold membership for your vehicle (max.1).

If you are a business owner with more than one vehicle, you are not allowed to subscribe multiple vehicles to one gold membership account, as you do not belong to the same household. You can reach out to us about our business solution, so we can successfully onboard you to the membership for business solution. You will receive a Fastned discount, and additional B2B requirements such a central invoicing by the end of the month. If we find out that you are registered as a business with multiple cars on the gold membership, we have the right to inform you about the B2B membership and migrate you. If you refuse migration, we have the right to block your gold membership account.
